PROFESSIONAL SUMMARY

MBA-qualified Business Analyst with 9+ years of experience turning unclear business problems into clear requirements, redesigned processes and tested digital solutions across e-commerce, event technology and payments, tax technology and hospitality. Skilled in requirements elicitation, stakeholder management, As-Is and To-Be process mapping, user stories with acceptance criteria, requirements traceability and user acceptance testing (UAT). Owned a live multi-currency ticketing platform from first build to production, using root-cause analysis to fix payment, reporting and access-control problems that customers experienced as isolated complaints.

CORE SKILLS

Business analysis: Requirements elicitation, Business Requirements Document (BRD), Functional Requirements Document (FRD), user stories and acceptance criteria, Requirements Traceability Matrix (RTM), MoSCoW prioritisation, gap analysis, root-cause analysis, business rules and decision tables

Process and delivery: Process mapping (BPMN, As-Is and To-Be swimlanes), stakeholder management, UAT planning and execution, Agile backlog management, RAID management, change management, benefits evaluation

Data and tools: Microsoft Excel, Jira, Monday.com, Airtable, Microsoft 365, Google Analytics 4, Make, Zapier, Shopify, WordPress

PROFESSIONAL EXPERIENCE

Business Analyst

2024 to Present

The Ecommerce Boss / Remote

- Lead business analysis engagements for small businesses and SMEs across marketing operations and web development, turning requests such as "we need a website" into agreed goals, success measures and prioritised requirements.
- Map As-Is and To-Be processes and connect websites (WordPress, Shopify), forms, Airtable, Make, Zapier and GA4 so every enquiry is captured, followed up and traceable to its source.
- Prioritise scope against tight budgets with MoSCoW, test every change with the owner before go-live and hand over with guides and training.

Product Owner and Business Analyst

2024 to 2026

HunterTV Africa / Remote (Canada)

- Owned MyTicketSeller, a live multi-currency event-ticketing platform, from first build to production; wrote requirements and acceptance criteria for contract developers and consolidated four separate codebases into one platform.
- Traced duplicate customer charges to a false "payment failed" state and specified return-page payment verification with automated reconciliation, so tickets are issued immediately and no paid order depends on a single payment callback.
- Identified that foreign-currency sales were mis-converted and blended in organiser and admin reporting; defined per-currency revenue, wallet balances and payouts.
- Designed role-based event access (door staff, viewer, manager) and owner-only ticket scanning, replacing shared organiser logins at the door.
- Specified verified refund handling for Stripe and Flutterwave, chargeback evidence export and consent-gated GA4, Meta and TikTok tracking; led a security review that removed exposed secrets and debug endpoints.
- Prioritised and shipped 90+ changes in 10 weeks, each traced to a written requirement with acceptance criteria.
- NaijaFoodFestival: discovered that one "registration website" request covered three distinct journeys (attendee, vendor, volunteer); designed separate workflows, forms, approval steps, automated emails and reporting, and tested each journey before launch.

Business Analyst (Contract)

2026

Komfort Place Signature / Remote

- Mapped the As-Is enquiry journey and found booking intent was lost between social-media discovery and conversation; designed a website-to-WhatsApp booking funnel with one-tap booking on every page.
- Specified a first-party click-event data model and analytics dashboard showing booking taps by page and hour; implemented consent-gated GA4 and Meta Pixel.
- Planned 14 local SEO service guides and reviewed all content against search and advertising policies before publishing.

Business Analyst (Contract)

2024 to 2026

Taash (tax technology) / Remote

- Translated Nigerian tax rules into segmented journeys for PAYE employees, freelancers, business names and companies, backed by versioned decision tables.
- Updated relief logic for the Nigeria Tax Act 2025 (rent relief and the ₦800,000 zero-rate band) as a controlled, effective-dated rule change.
- Defined 9 business requirements traced to 11 UAT scenarios, with an escalation route for cases outside supported conditions.

AI Evaluation Analyst (Contract)

2025

Mercor and Outlier / Remote

- Evaluated AI outputs against detailed criteria for factual accuracy, completeness, reasoning quality and instruction adherence, documenting the rationale for each decision.
- Applied evolving guidelines consistently across high volumes of cases, flagging ambiguity and unsupported assumptions.

IT Project Manager and E-commerce Manager

2021 to 2024

BOZ Jewelry / Lagos, Nigeria

- Led stakeholder discovery across owners, developers, creatives and customer service for an e-commerce rebuild and Microsoft 365 rollout, translating technical options into cost, security and user-impact terms.
- Introduced Monday.com ownership tracking and automated reporting covering milestones, dependencies, risks and decisions.
- Analysed recurring enquiries and custom-order disputes, leading to an AI chatbot and structured custom-order capture; improvements contributed to a reported 60% increase in engagement and 25% improvement in digital performance.

Digital Marketing Analyst and Delivery Lead

2017 to 2020

Creatrix Empire / United Kingdom

- Consolidated reach, engagement, traffic and conversion data to identify stronger channels and formats; recommendations contributed to a reported 45% increase in engagement.
- Investigated weak organic acquisition through keyword, content and site-performance analysis, prioritising SEO improvements associated with around 150% organic traffic growth.

ADDITIONAL EXPERIENCE

Facilities Assistant

Jun 2026 to Present

NHS Leicestershire / Leicester, United Kingdom

- Prioritised facilities requests by safety and infection-prevention impact, completed work within procedure and escalated access and resource constraints to supervisors.

EDUCATION

MBA, Business Administration and Management

2026

York St John University / United Kingdom

BBA, Business Administration and Management

2024

Nexford University
